

for efficient system cooling and ventilation

Axial fans and fan drives

- ✓ High airflow
- ✓ Compact
- ✓ High static pressure

circular arc profile K6Z / K7Z

K6Z best performance \varnothing 700 - 1.000 mm
max. \varnothing 1.251 mm

K7Z best performance \varnothing 700 - 1.000 mm
max. \varnothing 1.253 mm

WingFan Axial fan K6Z/ K7Z

Blade profile	Best performance	Ø max.
K6Z 	Ø 700–1.000 mm	1.251 mm
K7Z 	Ø 700–1.000 mm	1.253 mm

The K7Z offers better efficiency and is more compact due to the twisted blades. For maximum airflow and static pressures the symmetrical K6Z blade is the best option.

Our sophisticated modular system of flexible combinable components consisting of blades with different pitch angles, hubs sizes and mounting options (e.g. centre bosses or bushings) allows us to custom engineer the K6Z / K7Z fan to your specific application.

K6Z and K7Z Blades are available in glass-fibre reinforced, lightweight nylon (PAG). All hubs are made from pressure die-cast Aluminum.

For additional noise reduction and improved fuel economy, WingFan Axial fans can be supplied with Fan drives to control fan speed in proportion to engine cooling needs. Take advantage of our specially designed lightweight and compact system solutions.

WingFan Global

WingFan has a world-leading position in modular Axial fans for engine cooling and radiators as well as in HVAC and refrigeration.
