

for efficient system cooling and ventilation

Axial fans and fan drives

- ✓ High efficiency
- ✓ Compact
- ✓ High versatility

airfoil profile P4Z / P5Z / P6Z

P4Z best performance \varnothing 500 - 850 mm
max. \varnothing 1.019 mm

P5Z best performance \varnothing 550 - 1.000 mm
max. \varnothing 1.261 mm

P6Z best performance \varnothing 630 - 1.250 mm
max. \varnothing 1.343 mm

WingFan Axial fan P4Z / P5Z / P6Z

Blade profile	Best performance	Ø max.
P4Z 	Ø 500–850 mm	1.019 mm
P5Z 	Ø 550-1.000 mm	1.261 mm
P6Z 	Ø 630-1.250 mm	1.343 mm

The highly versatile airfoil profile blades are suitable for a wide variety of applications. The narrow chord length makes the fan very compact for application with little installation space.

Our sophisticated modular system of flexible combinable components consisting of blades with different pitch angles, hubs sizes and mounting options (e.g. centre bosses or bushings) allows us to custom engineer the P4Z / P5Z / P6Z fan to your specific application.

P4Z / P5Z / P6Z blades are available in glass-fibre reinforced, lightweight nylon (PA or PAG). For use in explosive environments we offer anti-static carbon fibre reinforced nylon (PACAS), only available from WingFan. All hubs are made from pressure die-cast aluminum.

For additional noise reduction and improved fuel economy, WingFan Axial fans can be supplied with Fan drives to control fan speed in proportion to engine cooling needs. Take advantage of our specially designed lightweight and compact system solutions.

Wingfan Global

WingFan has a world-leading position in modular Axial fans for engine cooling and radiators as well as in HVAC and refrigeration.
